Search workspace or run a command

Ctrl K

Local reasoning

Demo data

Source coverage and health

Know what the search reached—and what it did not.

Inspect source capability

ITEM / EVIDENCE	STATUS
Greenhouse-like public listing Discovery fixture only	Demo
Lever-like public listing Read path; employer submission key not assumed	Read only
Regional source Unsupported locale in example	Unsupported
Aggregator refresh Last-known records retained with warning	Degraded

Open source evidence → Review before action

CAPABILITY MATRIX

Discover / inspect / fill / upload / submit / confirm.

Each operation is qualified independently.

Counts never imply whole-internet coverage.

Evidence and uncertainty stay visible.

IMPLEMENTATION GUARD

Failed source is not zero jobs.

DESIGN REFERENCE • FICTIONAL DATA • no live applications or measured model performance

Pause queued work

ITEM / EVIDENCE

STATUS

Fetch employer evidence

Public request; no candidate profile sent

Running

Local reasoning

One GPU generation slot

Queued

Document render checks

Restricted local worker

Queued

Application submission

Never part of an unattended research run

Protected

Open source evidence → Review before action

RUN BUDGET

Normal role: bounded queries, pages and repairs.

Partial findings are preserved.

Cancellation after a write cannot undo it.

Evidence and uncertainty stay visible.

IMPLEMENTATION GUARD

An endless spinner is not a valid recovery policy.

DESIGN REFERENCE • FICTIONAL DATA • no live applications or measured model performance

Create encrypted backup

ITEM / EVIDENCE

STATUS

Backup scope

Evidence, versions and schema manifest

Selected

Encryption and key

Stored separately from exported archive

Required

Restore verification

Test hashes and counts in clean workspace

Required

Deletion limits

SSD overwrite is not guaranteed erasure

Disclosed

Open source evidence → Review before action

RESTORE SAFETY

Preview what will be restored.

Never overwrite a newer workspace silently.

Failed migration preserves last good state.

Evidence and uncertainty stay visible.

IMPLEMENTATION GUARD

An encrypted database does not encrypt every export.

Demo data

Run diagnostic profile

Resource diagnostics

Measure memory, latency and correctness together.

ITEM / EVIDENCE	STATUS
UI process Idle CPU and resident memory	Pending
Model process Dedicated/shared VRAM; offload	Pending
Browser process Included in aggregate resource budget	Pending
Task quality Context recall and grounded answers	Pending

[Open source evidence](#) → [Review before action](#)

PERFORMANCE TARGETS

All figures in this design are targets or examples.

No target-device benchmark has run here.

Do not improve a metric by excluding child cost.

Evidence and uncertainty stay visible.

IMPLEMENTATION GUARD

Rust is not a performance benchmark.

DESIGN REFERENCE • FICTIONAL DATA • no live applications or measured model performance
